

ROTATIONAL DUMPING (DB)

Carts can be fitted with trunnion pins for use with CECOR’s patented dumping frame. The cart latches securely to the dumping frame, which in turn is secured to a forklift or hook hoist for elevated dumping. The trunnion pins adjust to accommodate different loads from light-and-bulky to dense-and-heavy. Spring-loaded trigger on the frame overturns the cart, which rotates a full 360 degrees. The empty cart returns to an upright position for return to the floor.

CECOR DUMPING FRAMES

Dumping Frame	CECOR Cart	Shipping Weight
DF-1042	DB-342	70 LBS.
DF-1043	DB-043 • DB-243 • DB-L43	105 LBS.
DF-1044	DB-044 • DB-244 • DB-L44 • DB-X44	110 LBS.
DF-1054	DA-254	145 LBS.
DF-1056	DB-256	185 LBS.

CECOR Dumping Frames sold separately from carts.

HYDRAULIC DUMPING (RB)

Some carts can be fitted with t-rail cleats for use with hydraulic dumping systems. The t-rail cleat engages the cart from the bottom for quick, complete and safe emptying. Some exceptions apply.

FORKLIFT DUMPING (FB)

Some carts can be fitted with forklift pockets for use with fork trucks for fast and easy emptying. Some exceptions apply. Contact us for more information.

For manual dumping options, see CECOR’s Tilt Truck Series.

Some CECOR carts (WB) can be equipped with both trunnion pins and t-rail cleats. Please inquire for more information.
